

A game for 2 players. You need **two dice, 12 counters for each player and a game board**. One player uses the left-hand grid, the other uses the right-hand grid.

1. Take turns to roll the 2 dice and cover on your board EITHER the sum or the difference of the numbers you threw.
2. If both numbers are already covered, then you can't go.
3. The first person to cover their board is the winner
